Let's have the color choice!

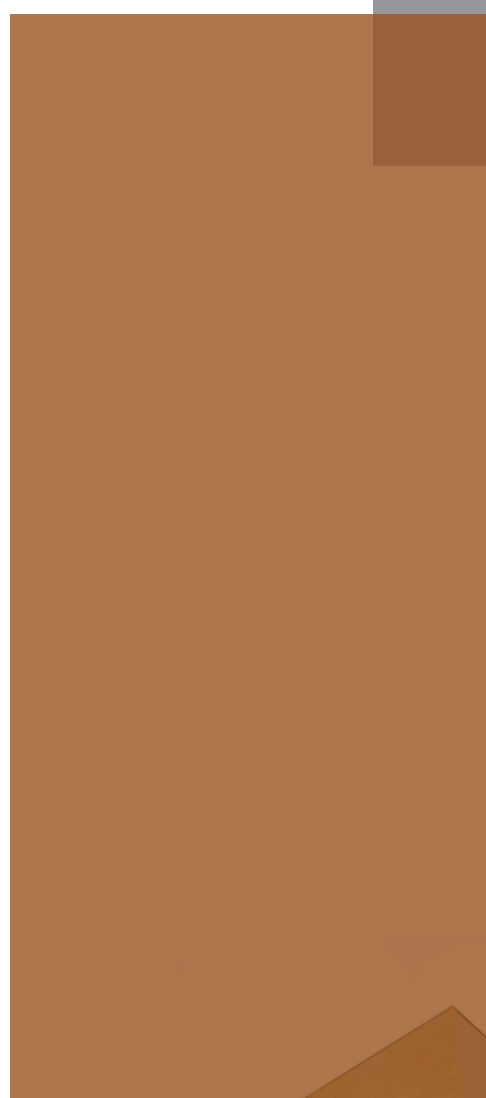

Munksjö is proud to present its new **OUTDOOR 3** collection. With this catalogue there are no limits with solid color decor papers to dress the façades of industrial and residential buildings, balconies, pillars, plinths and other urban furniture and playgrounds with exterior compact laminates.

Because each application is unique and considering the evolutions of this specific market segment, Munksjö has come up with a wider choice of color solutions suitable for the exterior market.

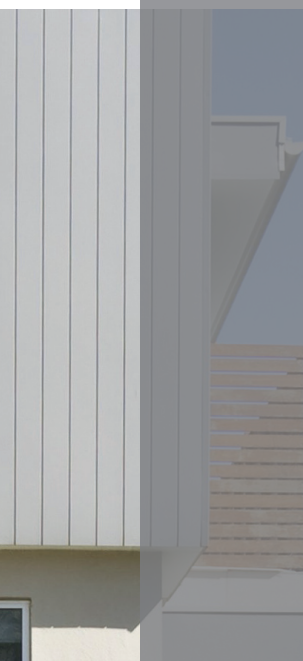

With more than 130 colors enabling you to make your projects stand out and offer the personal touch expected by your customers, the **OUTDOOR 3** collection expresses the latest trends as well as the basic and timeless Colors.

Let's choose colors for your outdoor projects!

Let's work with **OUTDOOR 3 by Munksjö!**

OUTDOOR 3

munksjö

Let's have the color choice!

OUTDOOR 3 is a collection of solid color decor papers specifically designed for exterior compact panel applications. It is composed of more than 130 colors enabling you to make your projects stand out and offer the personal touch expected by your customers.

More than a simple selection of tints, the **OUTDOOR 3** range is a comprehensive offer structured around 15 different families of colors offering a unique and incredible choice which will answer to the needs of the market, from the lightest neutral to the darker tone, from the fresh pastel to the most intensive color!

All decor papers in the **OUTDOOR 3** collection have been specially formulated to fulfill the requirements of exterior compact panels. Munksjö's color experts tested these colors with a transparent weather protection film and all of them have shown an excellent resistance to artificial weathering testing (including light and rain), as per EN 438-2 part 29. Each color achieved a test result higher than or equal to 3 after 3000 h exposure on the grey scale.

These tests results prove that the **OUTDOOR 3** collection provides a reliable and durable option for solid color decor paper for exterior applications*. With this collection we strive to not only provide aesthetically pleasing colors but also an environmentally friendly product solution. To make decor paper, Munksjö uses renewable raw materials incl. a major part of natural fibers.

Our pulp used for our paper production is chlorine-free and sourced from controlled, sustainable forestry and other controlled sources and certified according to FSC® standards (Forest Stewardship Council®).

With the **OUTDOOR 3** collection, Munksjö expresses the latest trends as well as the basic and timeless Colors. Let's choose colors for your outdoor projects! Let's work with **OUTDOOR 3 by Munksjö!**
